THIS DOCUMENT CONTAINS INFORMATION AFFECTING THE NATIONAL DEFENSE OF THE UNITED STATES WITHIN THE MEANING OF TITLE 18, SECTIONS 793 AND 794, OF THE U. S. CODE AS AMENDED. ITS TRANSMISSION OR REVELATION OF ITS CONTENTS TO OR RECEIPT BY AN UNAUTHORIZED PERSON IS PROHIBITED BY LAW. THE REPRODUCTION OF THIS FORM IS PROHIBITED.

THIS IS UNEVALUATED INFORMATION :

50X1-HUM

The Department of Physics of the University of Ljubljana experienced great difficulties in August 1951 in attempting to locate 100 grams of toluene which were needed for laboratory work. After attempts to purchase this material from private and official agencies had proved unsuccessful, the Physics Department requested a loan of toluene from the state-owned dynamite factory at Kamnik (Stein), about 20 kilometers north-west of Ljubljana. The factory authorities replied that they had absolutely no toluene. Finally the Physics Department succeeded in obtaining 100 grams of inferior toluene which could scarcely be distilled. The source of this toluene, however, is not known.
